# Protect & Store

Your digital safe

PROTECT & STORE allows you to protect your company's sensitive data in a real digital safe. Your data is secured.

Simple and easy solution

Upload and search your files through an intuitive GUI. Each file is linked to an "owner" user. User has only access to authorized documents.
Keep all your business data in a single secured place.

Traceability

Admin has an overview of each operation (encryption, uploads/downloads, users, etc.), without having access to the data.

Benefits

- Quick to set up.
- Secured: resistant to brute force decoding attempts.
- Not greedy in resources.
- Adapted to any structure.

INES technology

INES is a symmetric cryptography solution based on random functions randomly distributed developed by JLMorizur Engineering. 3 security modes and 4 encryption levels. Double factor authentication and private key available.

Features

- 3 security modes available
- 4 levels of encryption per mode
- No plugin to download
- File version management
- File classification management
- Search
- Preview
- Suitable for any type of file
- Traceability of operations

Technical requirements

- HTLM 5
- Advanced Encryption System
- Chrome, Firefox, Edge
- Web responsive
